DETAILED ACTION

RCE acknowledged

A request for continued examination(RCE) under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/23/05 has been entered.

Election of Species

1. This application contains claims directed to the following patentably distinct species of the claimed invention. Claim 15 or 58 recites various species of bupropion metabolites. Each metabolite is patentably distinct, for instance, US6391875 teaches (S,S)-2-(3-chlorophenyl)-2-hydroxy-3,5,5-trimethyl-morphinol and the same species were included in the original claim 15 or 58. US'875 reported that "(S,S)-2-(3-chlorophenyl)-2-hydroxy-3,5,5-trimethyl-morphinol does not show toxic effects that is associated with other metabolites", see remarks at page 6 (4th paragraph).
2. This application contains claims directed to the following patentably distinct species of the claimed invention and further, the search for entire group is burdensome. Claim 14 recites various species of affective disorders. As evidenced numerous documents including Exhibits (applicant's filed 8/23/05), each condition has materially

Art Unit: 1618

different biological manifestations and utilizes different underlying mechanisms, and furthermore, require specific drug treatment .

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election. **Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.**

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Conclusion

1. It is noted that the restriction requirement is necessitated by amendment filed 8/23/05
2. 37 CFR 1.142(a), second sentence states: " if the distinctness and independence of the invention is clear, such requirement will be made before any action upon the merits however, it may be made at any time before final action in the case at the discretion of the examiner.". Thus, the instant restriction requirement is considered to be proper in timely manner.

3. No claim is allowed.
4. All pending claims are subject to supplemental restriction/election requirement.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vickie Kim whose telephone number is 571-272-0579. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman Page be reached on 571-272-0602. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
